

TechFlow Terms of Service & Support Operations Manual

Effective Date: January 1, 2023 | Last Updated: November 2024 | Version: 3.2

1. SUBSCRIPTION PLANS & PRICING

Available Plans

We offer the following subscription tiers for our services:

Basic Plan

- Monthly: \$9.99/month (auto-renew)
- Annual: \$99.90/year (17% discount, auto-renew)
- Includes: 50 API calls/month, 1 user seat, email support (24-48hr response)
- Best for: Individual developers, testing

Professional Plan

- Monthly: \$29.99/month (auto-renew)
- Annual: \$299.90/year (17% discount, auto-renew)
- Includes: 5,000 API calls/month, 5 user seats, priority email support (4-12hr response), integrations (up to 3)
- Best for: Small teams, production use

Enterprise Plan

- Custom pricing based on requirements
- Includes: Unlimited API calls, custom user seats, dedicated account manager, 24/7 phone support, guaranteed 99.9% SLA, custom integrations
- Best for: Large organizations, mission-critical use

Price Changes & Notifications

- TechFlow reserves the right to modify subscription pricing with **30 days' notice**
- Price changes apply to new subscriptions and renewals only
- Existing active subscriptions maintain current pricing until renewal
- Customers notified via email at account email address
- If customer disagrees with price change, they may cancel before new price takes effect

Billing & Payment Details

- Subscriptions are billed monthly or annually **in advance** of service period
- Payment is automatically charged on the renewal date
- We accept: Major credit cards (Visa, Mastercard, Amex), ACH bank transfers, wire payments (Enterprise only)
- Invoices sent 2 days before charge date
- Failed payments: Automatic retry after 3 days; if still failed, service suspended
- Tax added to invoice for customers in applicable jurisdictions (US states, EU VAT, etc.)
- Billing contact can be different from account owner (for invoicing purposes)

Usage Tracking & Overages

- API usage tracked in real-time on dashboard
 - Monthly usage limit warnings sent at 50%, 80%, 100% of limit
 - Overage charges: \$0.10 per additional API call (no auto-cap, unlimited)
 - Overage charges billed separately at end of month
 - Large overage notification: If overage >\$100 in a month, account manager contacted
 - Customers can set overage cap or request plan upgrade to avoid surprise charges
-

2. REFUND & CANCELLATION POLICY

Refund Window & Eligibility

14-day money-back guarantee for new subscriptions (calculated from account activation date, not purchase date):

Full Refund Eligible (100% of subscription cost):

- Subscription used for less than 5 hours total
- No more than 3 data sync operations performed
- No custom integrations configured or tested
- Account still has all default settings (no customization)
- Request submitted within 14 days of activation
- No data export or bulk downloads

Partial Refund Eligible (50% of subscription cost):

- Used between 5-20 hours
- Active integrations or custom configurations
- Still within 14-day window
- Some data processed but minimal usage
- Customer has legitimate complaint about functionality (not user error)

No Refund Eligible:

- Beyond 14-day window
- Used extensively (>20 hours or >10 data syncs)
- Downloaded or exported significant data
- Received custom professional services or consulting
- Subscription expired naturally (renewal not taken advantage of new subscription benefit)
- Customer used service for specific project, then cancelled

Refund Processing Timeline

- Refund requests reviewed within 2 business days
- If approved, funds issued to original payment method
- Card refunds: 5-7 business days (bank dependent)
- ACH/bank transfer refunds: 7-10 business days
- Refund confirmation email sent with expected arrival date
- Refund tracking available in account dashboard under "Billing History"

Refund Amount Calculation

- For monthly subscriptions: Full monthly amount refunded if within 14 days, otherwise no refund
- For annual subscriptions: Pro-rated calculation = (remaining days in year / 365) × annual price
 - Example: Refund requested on day 10 of 365-day subscription = $(355/365) \times \$299.90 = \290.50
- Usage credits earned: Deducted from refund amount
 - Example: \$99.90 annual refund - \$10 earned credits = \$89.90 refund
- Refund minus \$50 admin fee if customer used service extensively then requested refund (waived for legitimate issues like bugs)

Cancellation Procedures

- Customers may cancel anytime: Account Settings → Subscriptions → Manage Subscription → Cancel
- Cancellation is effective at **end of current billing period** (not immediate)
 - Example: If billed on the 15th and cancel on the 10th, service continues until next billing date (15th)
 - Email confirmation sent with cancellation date
- Service access continues until cancellation date
- Last invoice covers service through cancellation date
- No refund for remaining unused subscription time after current period ends
- Reactivation: No fee if customer resubscribes within 30 days (same plan terms apply)

Data Retention After Cancellation

- **Days 1-30 post-cancellation:** Data accessible (for export or account recovery)
- **Days 31-60:** Data permanently deleted from production systems
- **Backup copies:** Retained for 60 days for disaster recovery only (not accessible to customer)
- **Data export:** Free export available for 30 days post-cancellation via account dashboard
- **After 30 days:** \$25 fee for manual data export (if still within 60-day window)
- **After 60 days:** Data permanently destroyed, no recovery possible

Downgrade & Plan Changes

- Customers may downgrade anytime (effective at next billing cycle, not retroactive)
- Downgrade example: \$29.99/month Professional → \$9.99/month Basic
 - Refund: $(\text{remaining days in cycle} / \text{days per month}) \times (\$29.99 - \$9.99)$
 - If 15 days remaining: $(15/30) \times \$20 = \10 refund
- Upgrade: Takes effect immediately, charged pro-rated amount for current cycle
 - Example: Upgrade on day 15 of 30-day month: $(15/30) \times (\$29.99 - \$9.99) = \$10$ additional charge
- Plan changes processed within 1 hour (sometimes instant)
- Upgrade pricing: NOT refundable if customer upgrades then wants to downgrade within same cycle
- Feature loss: When downgrading, explain which features will be lost/reduced
 - Basic plan: 1 seat → Professional: 5 seats. If downgrading, warn about losing extra seats

Subscription Pause Option (Alternative to Cancellation)

- Customers can **pause subscription for up to 90 days** (instead of canceling)
- During pause: No charge, data retained, integrations paused (not deleted)
- Pause pricing: \$0/month during pause (free hold)
- Resume anytime within 90 days: Service resumes at original plan price, no gaps
- After 90 days: Account automatically cancels, data retained for 30 more days
- Useful for: Seasonal businesses, temporary project pause, cost reduction
- Can pause multiple times (up to 180 days total per year)

Non-Refundable Items & Charges

- **Custom professional services:** 100% non-refundable (consulting, implementation, training)
- **Third-party integrations:** Non-refundable if purchased separately
- **Administrative fees:** Non-refundable (change management, account migration, etc.)
- **Overage charges:** Non-refundable once incurred (but usage alerts sent proactively)
- **Data export fees:** Non-refundable
- **API overage charges:** Non-refundable, but alerts sent at 50%, 100% usage

Chargeback & Dispute Policy

Important: Customers who initiate chargebacks WITHOUT attempting to resolve through support will face permanent account suspension.

Proper dispute process:

1. Contact support first (support@techflow.com)
2. Explain issue (duplicate charge, service not received, etc.)
3. Support investigates and responds within 5 business days
4. If unresolved: Escalate to billing manager
5. If still unresolved: Request chargeback through payment processor

If chargeback initiated without support contact:

- Account immediately suspended
- Email sent explaining suspension reason
- TechFlow will pursue legal action to recover:
 - Original disputed amount
 - Chargeback fee (typically \$300-\$500)
 - Legal costs and interest
- Payment processor notified (may impact customer's future transactions with other merchants)

Legitimate disputes: Duplicate charges, service not provided, billing errors are resolved through support with refund/credit offered.

3. PAYMENT PROBLEMS & DISPUTES

Duplicate Charges

What constitutes duplicate charge:

- Same amount charged twice in same billing cycle
- Two consecutive subscriptions started accidentally
- Renewal charged immediately after upgrade

Resolution:

- Customer reports in support ticket
- Support verifies in billing records (takes 1-2 business days)
- If confirmed duplicate: Full refund issued for duplicate charge within 5-7 days
- If outside 30 days: Escalate to billing manager for case-by-case review
- Investigation for charges older than 30 days (may take up to 10 days)
- Credits or refunds determined on case-by-case basis by manager

Incorrect Charges (Wrong Amount, Wrong Plan)

If customer was charged for wrong plan:

- Difference refunded immediately if caught within 30 days
- If caught after 30 days: Refund for last 30 days, remainder as credit
- Service suspension immediately prevented (if charged for higher plan accidentally)

If customer was charged multiple times:

- Full refund for duplicate charges within 7 days of discovery
- Service suspension implemented to prevent further charges
- Account reviewed to determine root cause
- If system error: Automatic credit applied to next month

Failed Payments & Retry Logic

First failed payment:

- Immediate notification via email to account email + billing contact
- Automatic retry scheduled for 3 days later
- Customer can manually retry immediately in account settings

Second failure (3 days later):

- Another notification sent
- Account services suspended (access restricted, but not deleted)
- Data retained during suspension
- Another retry scheduled for 7 days after first failure

Third failure (7 days after first):

- Account locked (no access possible)
- Email sent with urgent notification
- Manual intervention required to restore
- Customer must contact support to update payment method

Recovery after failed payment:

- Update payment method in account settings
- Contact support (support@techflow.com) with new payment info
- Service restored within 1 hour of successful payment
- No late fees or suspension fees charged

Disputed Transactions

Dispute process:

- Customer reports disputed transaction in support ticket
- Support asks for details: transaction date, amount, reason
- Support investigates and responds within 10 business days
- For disputes > \$500 or multiple transactions: Escalate to Billing Manager
- Manager provides detailed finding and resolution

Common dispute reasons & resolutions:

- "I don't recognize this charge" → Cross-reference with account creation date. If account not created by customer, investigate fraud.
- "Charged but service not received" → Verify subscription was active and services functioning. If error, refund issued.
- "Charged twice" → Verify in billing system. If duplicate, refund issued immediately.
- "Wrong amount charged" → Calculate correct amount, issue difference as refund or credit

Chargeback alternative: If dispute unresolved through support, customer may file chargeback with payment processor (though note: chargebacks without support contact result in account suspension).

4. SERVICE LEVEL AGREEMENT (SLA) & UPTIME GUARANTEE

Uptime Guarantee

- **99.5% uptime guarantee** for all service tiers (excluding scheduled maintenance)
- Uptime calculated as: $(\text{Total minutes in month} - \text{Downtime minutes}) / \text{Total minutes} \times 100\%$
- Scheduled maintenance: Up to 4 hours monthly (typically 2 AM - 6 AM UTC, Sundays)
- Maintenance notifications: 48 hours advance notice sent via email
- Unplanned downtime: Due to hardware failures, network issues, security patches
- SLA credits do NOT apply to downtime during maintenance windows

Response Time Commitments

Critical Issues (Service completely unavailable/down):

- Response time: 1 hour
- Resolution target: 4 hours
- SLA credit if missed: 50% of monthly service fee

High Priority (Core functionality broken/severely degraded):

- Response time: 4 hours
- Resolution target: 24 hours
- SLA credit if missed: 25% of monthly service fee
- Example: API not working, data sync failing, login broken

Medium Priority (Feature partially broken, workaround available):

- Response time: 8 hours
- Resolution target: 48 hours
- SLA credit if missed: 10% of monthly service fee
- Example: Dashboard slow, export feature producing errors, occasional API failures

Low Priority (Feature requests, minor bugs, how-to questions):

- Response time: 24 hours
- Resolution target: 5 business days
- No SLA credit (best effort)
- Example: UI improvements, documentation requests, integration questions

SLA Credits & Service Recovery

If we miss SLA targets:

- 95-99.5% uptime: 10% service credit
- 90-95% uptime: 25% service credit
- 85-90% uptime: 50% service credit
- Below 85% uptime: 100% service credit (full month free) + escalation to executive team

Credit application:

- Automatic credit applied to next month's invoice
- Customer notified of credit via email with SLA report
- Cumulative credits do not roll over (use or lose each month)
- Credits cannot be converted to cash/refund

SLA exceptions (not covered):

- Issues caused by customer (misconfiguration, abuse)
- Issues caused by third-party services (payment processors, cloud providers)
- Customer-caused DDoS or performance testing
- Scheduled maintenance windows

Repeated SLA Breaches

- If customer experiences 2+ SLA misses in 30 days: Automatic escalation to support manager
 - Manager contacts customer to understand issues
 - For repeated breaches: Free month offered + root cause analysis provided
 - If 3+ breaches in 90 days: Plan review offered (may qualify for discounted Enterprise plan)
-

5. ACCOUNT SECURITY & DATA PROTECTION

Data Storage & Security

- Customer data stored in encrypted databases (AES-256 encryption at rest)
- Backups performed daily with 30-day retention
- Data hosted in US-based servers (ISO 27001 certified, SOC 2 Type II compliant)
- SSL/TLS encryption for all data in transit
- Customers may request data migration or export at any time (free)
- Multi-factor authentication (MFA) available for account security

Data Retention After Cancellation

- **Active customer data:** Retained indefinitely while account is active
- **30 days post-cancellation:** Data accessible for recovery/export (free)
- **31-60 days post-cancellation:** Data permanently removed from production systems
- **Backup copies:** Retained for 60 days for disaster recovery purposes only (not accessible)
- **Legal holds:** Data retained per regulatory requirements (GDPR right to be forgotten has exceptions)

Data Privacy & Compliance

TechFlow complies with:

- **GDPR:** Customers have right to access, modify, delete personal data
- **CCPA:** California residents have data privacy rights
- **HIPAA:** Available for healthcare customers (requires Business Associate Agreement)
- **SOC 2 Type II:** Annual audit confirms security and availability

Customer data rights:

- Personal data not shared with third parties without explicit consent
- Data deletion requests processed within 30 days
- Data export available in CSV/JSON format (free for 30 days, \$25 fee after)
- Privacy policy available at <https://techflow.com/privacy>
- Data processing agreement available for Enterprise customers

Security Incidents & Breach Notification

In case of security breach:

- Affected customers notified within 48 hours of confirmation
- Breach details provided: what was accessed, when, for how long
- Remediation steps provided: forced password resets, monitor accounts, etc.
- Free credit monitoring offered if personal financial data exposed
- Incident report available upon request (detailed analysis provided to Enterprise customers)
- Regulatory authorities notified per legal requirements

Customer responsibilities:

- Maintain strong passwords (minimum 12 characters, mixed case)
 - Enable multi-factor authentication (MFA)
 - Do not share account credentials
 - Report suspicious activity immediately
 - Keep contact info updated for security notifications
-

6. ACCOUNT SUSPENSION & TERMINATION

Reasons for Account Suspension

- Violation of Terms of Service or Acceptable Use Policy
- Non-payment after 14 days of collection notices
- Unauthorized access or account compromise detected
- Suspicious activity or fraud indicators
- Legal or regulatory requirements
- Resource abuse (excessive API calls, storage, etc.)

Suspension Process

1. **Investigation:** Support team reviews activity/violation (1-2 business days)
2. **Notification:** Customer receives email explaining reason and deadline to respond
3. **Response window:** Customer has 7 days to respond or remedy violation
4. **Suspension:** If unresolved, account suspended (data still accessible for 30 days)
5. **Escalation:** After 30 days of suspension, account may be permanently deleted

During suspension:

- Login and service access blocked
- Data still visible to customer (export available)
- Billing paused (no new charges)
- Integrations disconnected

Account Termination & Data Deletion

- Accounts inactive for 12+ months may be terminated
- Notice of termination sent 30 days in advance
- Customer has 30 days to request data export before deletion
- Final invoice issued for any outstanding charges
- Data permanently deleted after 60 days (unrecoverable)

Reinstatement & Account Recovery

Reinstatement after suspension:

- Suspended accounts may be reinstated if violation is remedied
- Reinstatement requires written request from account owner
- Customer must agree to compliance agreement (no future violations)
- Reinstatement fee may apply: \$50-\$250 depending on reason (waived for first offense)
- Processing time: 2-5 business days after approval

Data recovery:

- Data recoverable within 30 days of suspension (free)
- Data recovery between 30-60 days: \$100 recovery fee
- After 60 days: Data permanently deleted (unrecoverable)
- Recovery processed within 1 business day

7. ACCEPTABLE USE POLICY

Prohibited Activities

Customers agree NOT to:

- Use service for illegal purposes or violate any laws/regulations
- Send spam, malware, phishing content, or ransomware
- Attempt unauthorized access to systems or data
- Reverse engineer, decompile, or abuse the service
- Resell, redistribute, or share service access with non-authorized users
- Use service for cryptocurrency mining or bot traffic generation
- Engage in competitive intelligence or market research without permission
- Use service to attack, spam, or harass other customers
- Store or process illegal content (CSAM, hacking tools, etc.)

Resource Abuse

- Excessive API calls intentionally designed to disrupt service
- Storage abuse (uploading massive files to exceed limits intentionally)
- Bandwidth abuse (excessive downloads/streaming)
- Concurrent connection abuse (opening 1000s of simultaneous connections)
- Automated scraping or bulk data extraction

Monitoring & Enforcement

TechFlow reserves the right to:

- Monitor usage patterns for abuse (automated + manual)
- Throttle or block accounts with excessive usage
- Temporarily suspend service during abuse without notice
- Terminate accounts that violate acceptable use policies
- Cooperate with law enforcement for illegal activities
- Delete content that violates policies (CSAM, malware, etc.)

Violation Consequences

- First violation: Warning email + 7 days to comply
 - Second violation: Temporary suspension (24-48 hours)
 - Third violation: Permanent account termination
 - Illegal activity: Immediate termination + law enforcement cooperation
-

8. LOGIN ISSUES & ACCOUNT ACCESS

Password Reset Procedures

If customer forgets password:

1. Click "Forgot Password" on login page
2. Enter email address associated with account
3. Secure reset link sent to email (valid for 24 hours)
4. Click link and create new password (minimum 12 characters, mixed case recommended)
5. Login with new password
6. Confirmation email sent showing password was reset

Password reset troubleshooting:

- Reset link not received: Check spam folder, resend link, verify email address
- Email address changed: Contact support (identity verification required)
- Account locked: 5 failed login attempts trigger 30-minute lockout (then can retry)

Multi-Factor Authentication (MFA)

- MFA available for all accounts (optional but recommended)
- Setup: Account Settings → Security → Enable 2FA
- Methods: Authenticator app (Google Authenticator, Authy), SMS text message
- Lost MFA device: Contact support with identity verification (2-3 business days to restore)
- Backup codes: Generated when MFA enabled (save in secure location)

Account Lockout & Recovery

Account locked after:

- 5 failed login attempts within 1 hour (30-minute lockout period)
- Suspicious access detected (rapid login attempts from different countries)
- Customer reports account compromise

Recovery:

- Wait 30 minutes and retry
- Or reset password via "Forgot Password" link
- Or contact support (identity verification required, 2-4 hour response)

Suspicious Activity & Compromise

Signs of compromise:

- Unexpected login notifications from unfamiliar locations
- Password changed without your action
- Unexpected charges or activity
- Unusual API usage or data access

If compromised:

1. Immediately reset password
 2. Enable MFA if not already enabled
 3. Review recent logins and API activity
 4. Revoke any suspicious API keys
 5. Contact support if unauthorized charges incurred
-

9. TECHNICAL SUPPORT & BUG REPORTS

Support Channels & Response Times

- **Email:** support@techflow.com (Response: 4-48 hours depending on priority)
- **Chat:** In-app chat during business hours 9 AM - 6 PM EST, Monday-Friday (Response: 30 mins - 2 hours)
- **Phone:** 1-800-TECHFLOW (Enterprise customers only, 24/7 available)

Ticketing System

- All support requests tracked in ticketing system
- Ticket ID provided in confirmation email
- Customer can view ticket status anytime in account dashboard
- Email updates sent as ticket progresses

Bug Reports

Reporting a bug:

1. Provide detailed description of what went wrong
2. Steps to reproduce (exact actions taken)
3. Expected behavior vs. actual behavior
4. Screenshots/videos if applicable
5. Device/browser information (if relevant)
6. When it started happening

Bug severity classification:

- **Critical:** Service completely down, data loss, security issue → 1-hour response, 4-hour resolution target
- **Major:** Core feature broken → 4-hour response, 24-hour resolution target
- **Minor:** Inconvenience, workaround exists → 8-hour response, 48-hour resolution target
- **Enhancement:** Cosmetic issues, nice-to-haves → 24-hour response, best effort

Bug tracking:

- Bugs tracked in public status page: <https://status.techflow.com>
- Customer can view bug fixes and estimated fixes
- Release notes updated when bugs fixed

Feature Requests

- Feature requests reviewed quarterly by product team
- Popular requests prioritized (voted by customers)
- Feature request does NOT guarantee implementation
- Customer submitting request grants TechFlow rights to implement similar features
- Estimated development timelines subject to change

Known Limitations & Issues

Current product limitations:

- API rate limit: 10,000 requests/hour (Basic: 500/hour, Professional: 2,000/hour, Enterprise: unlimited)
- File size limit: 500MB per upload (batches up to 5GB)
- Storage limit: Per subscription tier (Basic: 10GB, Professional: 100GB, Enterprise: custom)
- Concurrent users: Limited by subscription (Basic: 1, Professional: 5, Enterprise: unlimited)
- API retention: 90 days of API logs stored (Enterprise: 1 year)

Known issues being worked on:

- Dashboard sometimes slow when >100k records loaded (workaround: filter data first)
- CSV export occasionally times out for large datasets (workaround: export in smaller batches)
- Mobile app login occasionally fails on slower connections (workaround: use web version)

Feature Request Process

1. Customer submits request via support@techflow.com or in-app "Suggest Feature"
2. Request reviewed by product team within 1 week
3. Decision: Approved, Under Review, or Declined (communicated to customer)
4. Approved features: Added to product roadmap (public at <https://techflow.com/roadmap>)
5. Customer notified when feature shipped

Voting & Prioritization

- Popular features appear on public roadmap
- Customers can vote on requested features (1 vote per feature per customer)
- Features sorted by: (customer votes × customer tier weight) + strategic importance
- Enterprise customer votes weighted 10x higher than Basic customers

Declined Features (Why)

- Out of scope (doesn't fit product vision)
- Technical limitations (cost too high, complexity extreme)
- Low demand (fewer than 5 customers requested)
- Duplicate of existing planned feature
- Conflict with existing features or roadmap priorities

Customer Compensation for Feature Requests

- Feature request submission does NOT entitle customer to free month or credit
- However: Customer who submitted most-voted feature receives 3 months free service (one-time award)

11. DISPUTE RESOLUTION & ESCALATION

Support Escalation Process

1. **Initial contact:** Customer submits support ticket with details
2. **Support response:** Support team investigates, responds within SLA (4-48 hours)
3. **If unresolved:** Customer can request escalation to manager within ticket
4. **Manager review:** Escalated within 5 business days
5. **Final resolution:** Manager provides final decision within 10 business days
6. **Executive escalation:** If still unresolved, customer can request executive review (rare)

Dispute Resolution Timeline

- Support team: Days 1-5 (investigation and initial response)
- Manager escalation: Days 5-15 (review and decision)
- Executive escalation: Days 15-30 (final review and resolution)
- Total maximum: 30 days from initial contact to resolution

Escalation Contact

- **Support Manager:** escalations@techflow.com
- **Executive Team:** executives@techflow.com (for extreme cases)
- Include ticket number and summary of issue in subject line
- Include what resolution you're seeking

Unresolvable Disputes

If dispute cannot be resolved through internal process:

- Binding arbitration offered as alternative to court proceedings
 - Arbitration details in full Terms of Service
 - Customer represented by arbitrator (neutral third party)
 - Decision typically within 60 days
 - Costs split 50/50 between customer and TechFlow
-

12. SUBSCRIPTION CANCELLATION & TERMINATION BY TECHFLOW

Termination Initiated by TechFlow

TechFlow may terminate service and cancel subscriptions if:

- Repeated violations of Acceptable Use Policy
- Non-payment after 60 days (all collection attempts exhausted)
- Customer threatens or engages in abusive behavior toward staff
- Customer breaches security or shares access with unauthorized parties
- Legal or regulatory requirement
- Product discontinuation (rare)

Service Discontinuation (Rare)

If TechFlow discontinues a service:

- **Notice:** 90 days' advance notice to all customers via email
- **Data export:** Available for 60 days after discontinuation
- **Refunds:** Pro-rated refund of prepaid service fees issued within 30 days
- **Migration:** Assistance provided for Enterprise customers (complimentary)
- **Alternative:** May offer migration to different TechFlow product at discounted rate

Feature Deprecation

Deprecated features receive:

- **60-day notice** before removal
 - **Migration path:** Alternatives or upgrade path provided
 - **Support:** Continued support during transition period
 - **Communication:** Email notification sent, in-app banner posted
 - **No refund:** For feature deprecation (plan price remains same)
-

13. CHANGES TO TERMS & CONDITIONS

Amendment Process

TechFlow may modify Terms of Service at any time:

- Changes posted to website immediately
- Changes become effective 30 days after posting
- Customers notified via email for material changes
- Continued use after 30 days = acceptance of amended terms
- For substantial changes: Opt-out window provided (customer can cancel without penalty)

Material Change Definition

Material changes include:

- Pricing changes
- Changes to refund policy
- Changes to data retention
- Changes to acceptable use
- Addition of new restrictions

Non-material changes (grammar, clarifications, formatting): No advance notice required.

14. CONTACT & SUPPORT INFORMATION

Support Channels

- **Email:** support@techflow.com (4-48 hour response)
- **Chat:** In-app chat Monday-Friday, 9 AM - 6 PM EST
- **Phone:** 1-800-TECHFLOW (Enterprise only)
- **Status:** <https://status.techflow.com> (uptime + known issues)
- **Roadmap:** <https://techflow.com/roadmap> (planned features)

Billing & Account Questions

- **Billing email:** billing@techflow.com (24-48 hour response)
- **Account changes:** Through account settings (instant) or support ticket

Escalations & Complaints

- **Support Manager:** escalations@techflow.com
- **Executive:** executives@techflow.com (extreme cases only)

Legal & Privacy

- **Data requests:** privacy@techflow.com (30-day response)
 - **Legal:** legal@techflow.com
 - **Security issues:** security@techflow.com (confidential reporting)
-

15. GOVERNING LAW & DISPUTE RESOLUTION

Applicable Law

These terms governed by laws of the State of California, USA. Customer subject to California law regardless of residence.

Dispute Resolution Method

- **First step:** Good faith negotiation between parties
- **Second step:** Mediation (neutral third party assists in resolution)
- **Final step:** Binding arbitration (not court)
 - Single arbitrator selected by JAMS (Judicial Arbitration and Mediation Services)
 - Arbitration held in San Francisco, California
 - Cost split 50/50 between parties
 - Decision final and enforceable in court

Class Action Waiver

Customer agrees disputes will be resolved individually, NOT as class action. No class action lawsuits permitted.

Document Version: 3.2 Last Updated: November 2024 **Next Review:** May 2025

For questions about these terms, contact: legal@techflow.com
